

MBJ Coaxial Lighting

Get 50% off on the new MBJ coaxial lights

From February 08, 2021 until February 28, 2021 we offer the new MBJ coaxial lighting COX with 50% off the regular net list price

The latest addition to the MBJ product range is a diffuse coaxial lighting. MBJ offers the COX model in two different light field sizes and six LED colors.

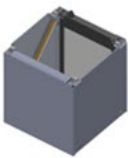

The coaxial lights are equipped with the integrated LED controller (-s) with 4 operation modes: steady light, steady light with brightness control, triggered steady light and flashlight.

All MBJ Imaging lightings are designed for use in the automation industry. The housing of the coaxial light is made of aluminum, and the camera opening at the top

is covered by a protective antireflective glass to keep dirt and dust away from the semi-transparent mirror.

Your benefits using an MBJ COX coaxial light:

- The emitted light is projected almost parallel to the camera axis across the entire field of view
- Ideal for illuminating highly reflective or translucent surfaces
- Suitable for inspecting scratches on objects, prints and labels or polished wafers

Coaxial Lighting							NEW SERIES
